

FEW CONDITIONS are more painful than
not knowing what condition you have.

We all know someone suffering from a mysterious medical condition. One that seems to baffle even the most seasoned physician. The frustration mounts as the condition worsens. And soon, they don't know where to turn.

You may want to consider Lahey. Let us be clear: we are not miracle workers (although many of our patients have used that term). Rather, we have built a formidable reputation for doing what other hospitals cannot. Namely, diagnosing and treating the untreatable. In neurology, gastroenterology, endocrinology and more – 39 specialties in all.

Much of our success comes from our unique team approach. Specialists working together to solve your problem. And because we are a teaching hospital affiliated with Tufts University, we're on the leading edge of medicine.

Do you have to be someone special to visit our hospital? Absolutely not. You just have to want to be treated right. For more information, please call 1-800-LAHEY-55 or visit www.lahey.org
