2009 Alumni Dues Appeal

Medical students and residents on rounds in Lahey's Surgical Intensive Care Unit.

The Lahey Alumni Association helps you stay in touch with your colleagues and maintain valuable professional connections to Lahey Clinic throughout your medical career—please become a contributor today!

Dear Lahey Alumnus,

Superb medical education at Lahey is a proud and ongoing tradition! As a teaching hospital of Tufts University School of Medicine, Lahey has long led the way in excellence in clinical teaching.

Your Lahey Alumni Association invites you to honor that past and to help build for the future. The hallmark of a great teaching program is the success of its alumni.

— Did you benefit personally or professionally from the training or experience you received at Lahey?

— Would you like to ensure that similar opportunities are available to today's generation of rising physicians?

If yes, please consider supporting your Lahey Alumni Association with a payment of your 2009 dues of \$100 today. An additional charitable gift to support alumni-funded programming will be much appreciated.

Your support bolsters the progress of Lahey's medical training program and opens the door of opportunity for residents and fellows in clinical medicine or research, and enhances the resources available for physicians who are presently serving on the medical staff at Lahey Clinic.

Sincerely,

Barry O'B. Woods, M.D.

Executive Director
