Dr. Carlton R. Souders: A Lasting Legacy

Skilled physician, gifted mentor, and devoted friend, Dr. Carlton R. Souders contributed to Lahey Clinic in many capacities and has been greatly missed since his death in March of 1996. His legacy continues on, however, both in the lasting contributions he made, and in the form of funding that will help ensure the continuation of the work to which he devoted himself for more than 36 years.

The Clinic recently received a significant, unrestricted gift through a

“Any patient here is a Lahey Clinic patient rather than the patient of a particular doctor. That is a special situation and I hope that the Clinic always hangs on to that aspect of its care.”

revocable trust that Dr. Souders created in 1969. The trust provided income to Dr. Souders and then to his wife, Dora “Pete” Souders, until she passed away last year. Then, family members received portions of the proceeds, and the remainder was distributed equally to Lahey Clinic and Franklin & Marshall College, Dr. Souders’ alma mater.

Dr. Souders’ gift will be applied to the upcoming expansion of the Burlington facility. It will serve as a fitting memorial for a man who dedicated so much of his life to Lahey Clinic.

Souders joined Lahey in 1936 as a

Fellow in Internal Medicine. Physician training became his passion, in addition to pulmonary medicine and patient care. He was active in the Clinic’s medical education programs, and was instrumental in the opening of Lahey’s education wing, which continues to contribute to the development of some of the most skilled and gifted physicians practicing today.

During his tenure, he also served on the Board of Trustees and the Board of Governors. He played a key role in the formation of the Alumni Association, and served on its advisory board. After his retirement in 1972, Souders turned his attention to fundraising, helping to raise \$15 million for the construction of the Burlington facility.

When interviewed in 1982, Dr. Souders said, “Any patient here is a Lahey Clinic patient rather than the patient of a particular doctor. That is a

special situation and I hope that the Clinic always hangs on to that aspect of its care.”

In truth, Dr. Souders did much more than hope. Through his lifelong

After his retirement in 1972, Souders turned his attention to fundraising, helping to raise \$15 million for the construction of the Burlington facility.

dedication and careful estate planning, he helped to ensure that countless patients and their families will continue to enjoy the Lahey standard of care. ■

New Catheterization Labs: State-of-the-Art Technology Meets Growing Demand

Lahey Clinic is pleased to announce the opening of three new state-of-the-art catheterization laboratories in the Katharine E. Merck Interventional Center. The \$3.5 million project was recently completed under the direction of

Clinic over the last three years. Cardiologists performed 4,650 procedures last year alone.

The new labs, located on floor 5 Central of Lahey's main facility in

The demand for catheterization has grown an astounding 30 percent at Lahey Clinic over the last three years. Cardiologists performed 4,650 procedures last year alone.

Richard W. Nesto, MD, chair, Cardiovascular Medicine.

"These brand new catheterization labs are already enhancing our capacity and capabilities," said Dr. Nesto.

"We are ready to handle the increased demand which is expected to grow steadily over the coming years."

The demand for catheterization has grown an astounding 30 percent at Lahey

Burlington, are all-digital, flat-panel imaging systems that help improve patient care and teaching opportunities while offering numerous operational efficiencies.

In terms of patient care, the new labs simultaneously improve image quality while reducing the amount of radiation needed to capture the image. Efficient storage of images and easy retrieval – not just within the lab but also from remote locations – aid in the review of cases with fellow physicians, residents, patients and families.

The three new labs represent the type of technological investments that are necessary for the Clinic to maintain its reputation for excellence. Lahey Clinic Heart and Vascular Center has been recognized by *U.S. News & World Report*, as well as health care ranking organizations including Solucient and HealthGrades.

In addition, two of the center's physicians have garnered attention. As part of an article for its February 2003 issue, *Boston* magazine asked hundreds of physicians who they would turn to if a loved one had a cardiac condition. Two of the names most often cited were the center's own Bruce E. Mirbach, MD, and Richard W. Nesto, MD. ■

Couple Remembers Lahey Clinic on Their Wedding Day

On her wedding day, Maureen Blood felt a deep sense of gratitude that her father, Francis, was there to walk her down the aisle. Maureen's soon-to-be-husband, David, was equally grateful to have his sister, Deborah, present. And both bride and groom give Lahey Clinic a lot of the credit for those two important family members being present on the couple's big day.

Both Francis Blood and Deborah Henderson have been patients at Lahey, and both families wanted to show their appreciation for the excellent care Lahey physicians and staff provided. So bride and groom decided that, in lieu of

having wedding favors, they would make a donation to Lahey Clinic.

"We selected Lahey because both of our families receive excellent care and compassion from Clinic staff," Maureen (Blood) Miller said. Francis Blood was referred to Lahey after fainting spells. He was quickly diagnosed with a cardiac condition that required a pacemaker implant, and is enjoying a greatly improved quality of life. Deborah Henderson underwent cancer treatment at Lahey, and is now optimistic and cancer-free.

"We are so appreciative of having our entire family together in good health," David and Maureen wrote in a

"We selected Lahey because both of our families receive excellent care and compassion from Clinic staff."

recent letter to the Clinic, "and we look forward to a happy future."

The couple's donation will be doubled through a matching gift program with Maureen's employer, Premier Insurance Company. Like many employers, Premier Insurance may match employee donations, dollar for dollar. ■

Lectures at Lahey

"The Iran Earthquake Relief Mission"

John Wei, MD
Senior Staff Surgeon
Department of Surgery
Lahey Clinic Medical Center

Wednesday, June 2, 2004
7:00 a.m. Lecture

Alumni Auditorium
Lahey Clinic Medical Center, Burlington

Lectures funded in part by the
Alumni Association of Lahey Clinic.

Recent Lectures

E. Nigel Harris, M Phil, MD, DM presents Antiphospholipid Syndrome: History, Pathogenesis, and Management at the Medical Grand Rounds Lecture on March 5, 2004.

Lecture participants included (from left to right) Dr. Corkery, Dr. Mandel, special guest Dr. Harris, Dr. Garcia-Banigan, and Dr. Orfanos.

Dr. Barrett Launches Chairman's Council

Lahey Clinic is honored to announce the launch of the Chairman's Council, a donor membership society that recognizes annual giving of \$10,000 or more of unrestricted giving to the Lahey Fund.

*David M. Barrett, MD,
Lahey Clinic CEO*

arteries of a legal assistant suffering a heart attack, or detecting breast cancer during a routine mammogram and then devising a program of treatment to return a woman to her normal activities and good health."

"I encourage donors who give \$10,000 or more annually to the Lahey Fund to join my Chairman's Council,"

invites Dr. Barrett. "I look forward to welcoming you to our invitation-only annual Chairman's Council breakfast and health lecture this year."

For more information about joining the Chairman's Council and enjoying its special benefits, visit the Lahey web site at www.lahey.org/chairmanscouncil or call Stephen Mally in the Philanthropy Office at 781-744-3908 to request a complimentary brochure. ■

Enjoy the Many Benefits of the Chairman's Council

- ◆ Dedicated appointment telephone line for Chairman's Council members
- ◆ Complimentary valet parking for each of your Lahey Clinic visits
- ◆ Complimentary annual membership in Medifile Links to provide many health care service discounts, travel protection benefits, and Medifile enrollment to ensure 365 day/24 hour access to your medical records from anywhere in the world
- ◆ Two complimentary tickets to an invitation-only annual Chairman's Council breakfast and health lecture
- ◆ A behind-the-scenes tour of Lahey Clinic for first-time members
- ◆ Recognition in the Lahey Clinic donor roll
- ◆ Invitation to a donor appreciation event

Alumni-Funded Initiatives

This year, the Lahey Alumni Association has shown an unprecedented level of support to residents, fellows, and the Clinic overall. Your membership dues and other contributions allowed the Association to:

- ◆ Fund more than \$21,000 in scholarships for residents and fellows to attend various seminars, medical meetings and other sessions around the world
- ◆ Contribute over \$11,000 to support more than seven lectures through medical and surgical grand rounds
- ◆ Raise \$6,500 to purchase computer equipment, books and subscriptions for the Cattell Memorial Library
- ◆ Purchase more than \$16,000 worth of audiovisual equipment for the Alumni Auditorium
- ◆ Provide \$15,000 toward Clinic operating expenses including the Alumni Reunion, Alumni News and other activities

Please help the Alumni Association continue to support important initiatives like these.

By keeping up with your Alumni dues, and making contributions toward the initiatives of your choosing, you help ensure that the Alumni Association will continue to be a vital force at Lahey Clinic. We hope we may count on your continued support. ■

Practicing Osteopath Brings Illustrations to Life

David M. Driscoll, DO, has been practicing general internal medicine and osteopathy for 10 years, and has been an artist and illustrator for more than 25. A new textbook edition gave him the chance to bring two of his passions together.

Co-authored by William L. Johnston, who developed the functional methods form in the 1950s, and Harry

Friedman, DO, *Functional Methods* features 30 of Driscoll's illustrations. He devoted two years to the work, and says that the line illustrations are deceptively simple.

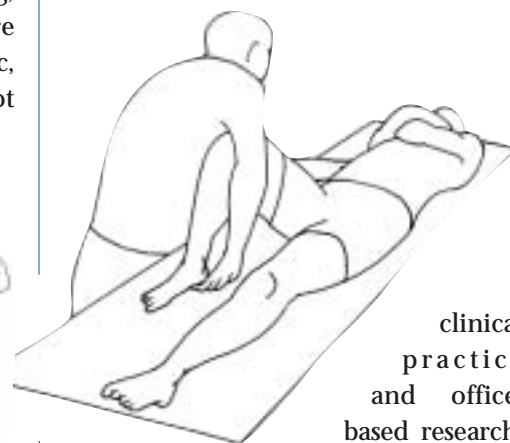

"Because there's no shadowing, one line has to define what you're trying to say...If you're too simplistic, you're not

revealing what you want to reveal. Too detailed, and you lose focus on the information you want to impart."

Driscoll has plenty of experience at revealing complexities through the use of a single line. He illustrated horse breeding manuals early in his career, and has worked on various other medical texts.

In addition to appearing in the *Functional Methods* textbook, Driscoll's illustrations were also part of a presentation at the Australian Osteopathic Association's (AOA) fall meeting in Tasmania, which focused on the application of functional methods in

clinical practice and office-based research.

Driscoll and Friedman presented the program, which was developed especially for the AOA meeting by Johnston before his death in June. ■
