Over the years, your skin becomes damaged by exposure to sunlight, pollution and stress. Now is the time to erase those fine lines and wrinkles and rejuvenate your skin to a more youthful appearance.

Lahey's Center for Cosmetic and Laser Surgery offers a full range of laser and cosmetic services. Our board-certified plastic surgeons and cosmetic dermatologists use the latest nonsurgical techniques and laser technologies to improve the appearance of your skin.

Fraxel® Laser Treatment

Fraxel creates tiny, microthermal zones of energy in your skin that destroy damaged collagen while generating new, fresh collagen. This improves fine lines and wrinkles, acne and surgical scarring, and results in smoother, more evenly pigmented skin. Fraxel can be used to treat the face, neck, chest and hands.

MicroLaserPeel™

MicroLaserPeel is an intense laser treatment that removes the outermost layers of the skin, and is tailored to your needs. This results in a significant change in texture and wrinkle improvement, which is an ideal treatment for those who want improved skin with immediate, lasting results.
