

# Division of Transplantation and Hepatobiliary Disease

## Liver Decompensation Clinic

At Lahey Hospital & Medical Center we provide comprehensive and innovative treatment for liver failure. The aim of our liver decompensation clinic is to improve access for patients with the urgent need of outpatient hepatology care with the linkage of care to the Lahey Liver Clinic.

### Who should be referred

- Patients with decompensated cirrhosis, regardless of alcohol use
- Patients with severely abnormal liver enzymes
- Patients with decompensated liver disease including:
  - Severe autoimmune hepatitis
  - Severe hepatitis B
  - Drug induced liver injury
  - Alcohol induced liver disease
  - Acute severe hepatitis

### What we offer

- 1. Timely scheduling of appointments:** Patient referrals are expedited based on clinical need.
- 2. Coordinated care:** New patients are seen by a team of liver disease experts.
- 3. Dedicated post-visit support:** Dedicated support for management of liver disease including a nurse navigator and a physician assistant are available to address any concerns after the visit.

### Treatment Options

- Advanced multidisciplinary hepatobiliary management of medical complications
- Interventional radiology and endoscopic management of liver disease
- Liver transplant

### To refer a patient:

- Fax: 833-461-0694
