

Division of Transplantation and Hepatobiliary Disease

Liver Tumor Clinic

At Lahey Hospital & Medical Center we provide comprehensive and innovative treatment for liver tumors, liver cancer and bile duct cancer. Our team of experts use cutting-edge targeted therapy to provide our patients with the best treatment for effective results and long-term outcomes.

Who should be referred

- Patients with a liver lesion, irrespective of the size
- Patients with cirrhosis with any solid liver mass
- Patients with large or symptomatic liver cysts
- Patients with Primary Sclerosing Cholangitis with suspicious bile duct stricture(s)
- Tissue biopsy is NOT required

What we offer

- 1. Timely scheduling of appointments:** Patient referrals are expedited based on clinical need.
- 2. Multidisciplinary care:** The dedicated liver tumor team includes hepatologists, medical and radiation oncologists, surgeons, diagnostic and therapeutic radiologists, and pathologists. The Multidisciplinary Liver Tumor Board meets weekly to review cases and discuss treatment plans.
- 3. Dedicated post-visit support:** Dedicated liver tumor support staff including nurse navigators, and a physician assistant are available to address any concerns after the visit.

Treatment Options

- Surgery
- Liver transplant
 - Deceased and living donor transplant
- Locoregional treatment
 - Y90 radioembolization
 - TACE
 - Ablation Therapy (RFA, MWA)
- Stereotatic body radiation therapy (SBRT)
